### Description

**Biotech 2008 – Life Sciences: A 20/20 Vision to 2020** is Burrill & Company's 22nd annual report on the state of the biotech industry, highlighting the critical developments in 2007 (across all sectors, not just human healthcare but also biofuels, agbio, industrial biotechnology, both in the US and globally). This edition has a special focus on the future and looks forward just over a decade at the projected environment for the industry in the year 2020... and develops the pathway that will lead us there. In an industry where change is a constant, Biotech 2008 is the industry's "roadmap" and a must read for all those interested in the revolution taking place in the life sciences world... changing the way we heal the world, feed the world, and fuel the world.

### Report options

- Access the online version of this report for only \$295.00. Alternatively, you can purchase both the print and online version for \$680.00.
